**To Whom it May Concern**

My name is Jacqueline Harte. I have received a B.S. in Physical Therapy and a Masters degree in acupuncture. I am a licensed acupuncturist in Arizona where I have been treating patients in my own acupuncture clinic for the past 5 years.

I have been using NMT as taught in the NMT seminars in my practice for the past year and have found it to be very useful in treating my patients. I have used NMT on patients with a variety of conditions, including digestive disorders, infections, hormonal imbalances, skin conditions and musculoskeletal complaints.

I would like to share two representative cases:

A 72 year old female with a diagnosis of collagenous colitis came to me for help with severe diarrhea occurring approximately every 2 hours throughout a 24 hour period, for the past 10 years. Prior to NMT treatment she could only leave her house after fasting. The morning after her first NMT session, I received an excited telephone call from her. For the first time in years she had slept a full 10 hours without waking. To date, she has received 7 NMT treatment sessions. She now complains of occasional symptoms, once or twice per month.

A 50 year old male with scaly patches of skin on his legs and recurrent blistering behind his knees for over 5 years. His medical doctor had prescribed courses of cortisone cream, but the problem kept returning. After receiving one NMT treatment the skin on his legs returned to normal after one week. One year later, the problem has not re-occurred.

NMT works as disclosed. The system as taught, by use of the NMT seminar manual has been very useful in treating patients. It has been particularly useful for those patients with chronic problems, for whom no other intervention has proven helpful.

Yours faithfully,

Jacqueline Harte M.Ac., L.Ac.
